

# Norovirus & Hepatitis A Virus Scheme

This non-accredited scheme provides proficiency testing (PT) samples to laboratories that examine food products or waters for hepatitis A virus and norovirus GI and GII using the reverse-transcription polymerase chain reaction (RT-PCR). This PT challenges laboratories in detection and quantification (copies per sample) of both these viruses. Implementing Regulation (EU) 2017/1142 (amending Regulation (EC) 669/2009) requires virus testing of frozen raspberries imported from Serbia, while Regulation (EC) 2073/2005 recommends adoption of virus testing for live bivalve molluscs once methods are developed.

This scheme is organised in collaboration with Cefas as the European Union Reference Laboratory (EURL) for monitoring bacteriological and viral contamination of bivalve molluscs. This scheme helps you to identify gaps in your processes, highlighting where quality improvements can be made. It also provides an opportunity to improve staffs knowledge and experience with organisms not frequently encountered.

The scheme focuses on raising awareness of:

- the variations of methods used which can highlight differences in PT results
- the limitation of methods available on the market
- updates in ISO methods

Examinations for this scheme are:

**Mandatory: Presence / Absence**

Norovirus GI, GII  
Hepatitis A virus

**Optional: Quantification of virus**

Norovirus GI, GII  
Hepatitis A virus

**Two distributions available per year, each containing two samples**

Your laboratory's personalised report will contain information such as:

- information on the contents and the levels of the samples
- performance data for each examination for you to compare your performance against other laboratories
- your on-going performance over a year which demonstrates your commitment to quality to clients and colleagues
- where relevant actions to take to ensure that your laboratory retains high standards
- educational information on difficult and challenging samples

For your investigation repeat samples are provided free of charge and further expertise can be provided by our panel of renowned food and water microbiologists

**Satisfactory performance with your PT provides assurance that your laboratory is compliant with testing standards, thereby meeting and maintaining accreditation requirements.**

# Assisting laboratories world wide in maintaining standards of excellence

Food, water and environmental laboratories play a vital role in protecting the public's health by helping to ensure that food is safe to consume, waters are safe to drink and that environmental and recreational waters do not make people ill.

Proficiency testing or external quality assessment provides laboratories with an independent external assessment of their performance. Regular participation in proficiency testing schemes is an important part of laboratories quality procedures and helps to ensure that the results of their tests are accurate.

With over 25 years of experience, UK Health Security Agency's Food and Environmental Proficiency Testing Unit is a world leader in providing microbiology proficiency testing schemes to food, water and environmental laboratories both in the UK and in over 70 countries internationally.

Our dedicated team of experts has unrivalled professional, scientific and technical expertise in proficiency testing. Participants also have the additional advantage of drawing on the full scientific resources of UK Health Security Agency.

## Benefits of participating in UK Health Security Agency's food and water proficiency testing schemes:

- Unique schemes provided:
  - that support both EU and non-EU legislation
  - inclusion of organisms such as *Mycobacterium* spp. in endoscope and cardiac cooler waters
  - Molecular scheme for Shiga-toxin producing *Escherichia coli*
  - *Vibrio cholerae* testing
  - *Staphylococcus aureus* Enterotoxin
  - Norovirus and Hepatitis A virus
- Free of charge repeat samples
- Access to expert food and water microbiologists
- Bespoke schemes reports provided
- UKHSA and z-scores provided in some scheme reports
- Ability to make extremely low level samples
- On-going performance assessment in the reports
- Samples provided in easy to use LENTICULE® discs
- Team members that speak several languages

## PT Schemes available include:

Environmental Swab  
European Food Microbiology Legislation  
Standard Scheme  
Non-Pathogen  
Norovirus and Hepatitis A virus\*  
Pathogenic *Vibrio*  
Shellfish  
Shiga toxin-producing *Escherichia coli*  
*Staphylococcus aureus* enterotoxin  
Bottled and Mineral Water  
Dialysis Water  
Drinking Water  
Endoscope Rinse Water  
Hospital Tap Water  
*Legionella* Isolation  
*Legionella* Molecular  
Recreational and Surface Water  
*Mycobacterium* spp. in Water
