

**Recreational and Surface Water Scheme
River, Lake and Stream Water Samples
Preliminary Intended Results Notification**

These results are provided for guidance and are determined from the examinations undertaken during quality control testing of the samples. The enumeration results may show minor variations from the final results, which are calculated from the participants' consensus results, and included in the distribution report.

Distribution: **S112** Samples: **S112A and S112B**

Intended results:

Enumeration	S112A Median	S112B Median
Coliform bacteria in 100mL	73	2.3x10 ²
<i>Escherichia coli</i> in 100mL	35	82
Enterococci in 100mL	69	0
Faecal coliforms in 100mL	35	2.4x10 ²
<i>Clostridium perfringens</i> in 100mL	26	0
<i>Salmonella</i> spp.	Detected	Detected

Sample contents:

S112A	<i>Enterobacter cloacae</i> , <i>E. coli</i> , <i>Enterococcus faecalis</i> , <i>C. perfringens</i> and <i>Salmonella</i> Infantis
S112B	<i>Klebsiella pneumoniae</i> , <i>E. coli</i> and <i>Salmonella</i> Enteritidis

Laboratory identification numbers of participants who did not return results this distribution: 1154 and 2408

The distribution report providing details of your individual performance and an analysis of all participants' results will be dispatched within three weeks. The report may also include sample specific comments.

Repeat samples are available for up to one year from date of this letter for participants who experienced problems with any of the examination. There is no need to wait until you have received the report to order repeat samples.

The next distribution of Recreational and Surface Water Scheme samples will be Marine (bathing beach) and will be dispatched during the week beginning 31 July 2023.

If you require any technical advice or wish to make comments or suggestions relating to the scheme, please contact us.
